

WG 6100 Additional Parts Kit

This is a kit containing parts as suggested to upgrade the 6100 for more reliable operation. NO claims are made that this will in fact prolong the life of your monitor & is not my compilation, but merely filling an order for parts as requested, & therefore, I will not be responsible for any damages incurred in using these parts.

95 percent of companies contacted for 3 watt resistors replied that they are being phased out & replaced with 5 watt resistors. Of the companies who specialized in resistors & had 3 watt, none had anything close in value to the 3 watt resistors called for and so the 3 watt resistors in this kit are substituted with 5 watt as suggested.

1	22 ohm 5 watt	R106
1	1.3K ohm 5 watt	R701
1	3.9 ohm ½ watt	R903
2	3.9 ohm 5 watt	R901, R907
1	6.8K ohm ¼ watt	R910
1	4.7K ohm ¼ watt	R911
1	2.2 ohm 5 watt	R926
2	5.6K ohm ¼ watt	R812, R813*
4	1µf 50v caps	C800-C803
2	4700µf 50v	C100, C101
4	MR751 diodes	D100-D103
2	6.25ASB fuses	F100, F101

*P314 deflection board already has these. Use only on P327 or P339.

Again, use at your own risk & I do not endorse any of these modifications.

2	MPS-U57	Q603, Q703
2	MPS-U07	Q604, Q704

The heavy duty version of the MPS-U07 & the MPS-U57 are listed above, but are far too expensive to include in the kit any longer... but are available to buy separately on the Parts Page.
